

How satisfied are patients with their dermatology professionals?

Board-certified dermatologists

Explained my condition
& treatment options well.

Spent enough time with me,
& cares about my concerns.

Would recommend to others.

Dermatology physician assistants

In a 2023 study by researchers at the University of Texas Southwestern, 12,386 patients seen by physician assistants and board-certified dermatologists reported equal satisfaction with the care received from both types of clinicians.
