

Dear President Scott,

We, the undersigned physician associates (PAs) represent a sampling of the thousands of our PA colleagues nationwide who share our deep concern regarding the American Medical Association's (AMA) ongoing campaign against our profession.

Despite previous communications from the American Academy of Physician Associates (AAPA), the AMA persists with its divisive "scope creep" rhetoric, undermining PAs' essential role in delivering high-quality, patient-centered care. This campaign has created unnecessary division and is responsible for confusing patients about the care they receive from highly trained and qualified healthcare providers.

Like our physician colleagues, we witness the struggles of our healthcare system daily. As dedicated providers, we are committed to meeting the evolving needs of our patients, which are often due to rising chronic conditions and an aging population. We, too, bear the strain of ongoing provider shortages and are working harder than ever to meet patient needs.

The AMA's rhetoric misrepresents the contributions of the nation's 178,000 PAs and does not reflect the views of many physicians. The most effective healthcare for people occurs when clinicians work together as a team, and many of our physician colleagues recognize and value the critical role PAs play in patient care and believe in the power of team-based care over preserving outdated hierarchies.

It is essential that all healthcare providers unite to overcome these challenges and build a more effective, inclusive system. The AMA's campaign against "scope creep" is overexaggerated propaganda. PAs support commonsense policy solutions that would update federal and state PA practice laws to reflect how healthcare is delivered today. We aim to ensure that all providers are afforded the ability to practice medicine at the top of their education, training, and experience. [Evidence shows](#) that when PA practice laws are modernized, patient safety and access to care improve.

The AMA's repeated blocking of legislation aimed at expanding access to care and creation of false narrative about the profession reflects a troubling disregard for the urgent needs of patients and the healthcare system. These efforts by the AMA hinder progress and undermine the value PAs bring to patient care.

We urge the AMA to stop using divisive rhetoric and instead engage in a constructive dialogue with AAPA.

We look forward to this new path forward and finding common ground for the benefit of all patients.

Sincerely,

ALABAMA
