Q1/2025

New from AAPA Research

Negotiate Your Pay With AAPA's Compensation Data

AAPA SALARY REPORT

The AAPA Salary Report is accessed by more than 35,000 PAs each year. Regardless of state, specialty, or practice setting, PAs use Salary Report data to negotiate their call pay, bonuses, raises, and initial offers.

Want to see how newly graduated PAs are using this data in their job hunt? Check out this interview with [PA Catherine Santizo](#)!

New AAPA Digital Salary Report data will be available April 25! AAPA members have access to additional tools within the platform, like the ability to compare compensations across data years. Be sure to add the [Digital Salary Report page](#) to your bookmarks!

Upcoming Events

Research Activities at AAPA 2025

As a reminder, AAPA 2025 is in Denver, Colorado, May 16 - 20. Thank you to all who submitted and to all reviewers! View the full schedule of research presentations [here](#).

Stay in the know and learn more about the research activities [here](#). For questions, reach out to postersession@aapa.org.

Research Connections

Join us for our quarterly networking sessions. Whether you're a seasoned researcher or curious and eager to explore, this session provides a platform to exchange ideas, share insights, and forge valuable collaborations.

[Click here](#) to register in advance for June 26, September 25, and December 11!

Newest Research on the PA Profession

Here are a few articles we think you should see:

- ["Demographics and Practice Attributes of Physician Assistants in Neurology"](#) by Bruza-Augatis, et al., examines the characteristics of PAs in neurology compared to those in other specialties. PAs in neurology are predominantly female (81.4%), younger (median age 36), and more likely to work in urban areas (96%) and hospital settings (54.5%) compared to their counterparts in other fields.
- In Martin and Kayingo's ["Doctoral education for physician assistants/associates: trends and characteristics in the U.S."](#) the authors highlight the rapid growth of PA-specific doctoral programs in the U.S. over the past decade. Most of these programs are less than three years old, offered by private institutions, and focus on leadership, education, and clinical practice advancement.

We Want to Hear from You!

PA researchers are invited to be featured in upcoming issues of the newsletter. Recently submitted interesting data? Won a small research grant? Share your insights on the publication process, filling knowledge gaps, and why research is paramount to the PA profession.

Interested? Reach out to us at research@aapa.org.

AAPA Strengthens Researchers

Funding Opportunities

The application cycle for the 2025-26 Fellowship year will open April 22, 2025. [Sign up](#) for our webinar to receive advice on the application process on March 24!

The AAPA Small Research Grant application will open in May 2025. Learn more about AAPA and external funding opportunities [here](#).
