Optimal Team Practice

Optimal Team Practice occurs when PAs, physicians, and other medical professionals work together to provide quality care without burdensome administrative constraints.

CHANGES PAs ARE SEEKING

To support Optimal Team Practice, states should:

- Eliminate the requirement for PAs to have an agreement with a specific physician.
- Create a separate majority-PA board to regulate PAs, or add PAs and physicians who work with PAs to medical or healing arts boards.
- Authorize PAs to be directly reimbursed by all public and private insurers.

WHY OPTIMAL TEAM PRACTICE MATTERS

Eliminating the requirement for a PA to have an agreement with a specific physician would enable practice-level decisions about patient care teams.

PATIENTS

will have greater access to high-quality healthcare.

EMPLOYERS

will have more flexibility in determining healthcare teams.

LEGISLATORS

will see increased access and lower Medicaid costs in their states.

PHYSICIANS

will be relieved of unnecessary administrative and legal burdens.

SUPPORT FOR OPTIMAL TEAM PRACTICE

The changes PAs are seeking represent a natural evolution of the PA profession. Patients, especially in rural and underserved areas, will benefit from greater access to the high-quality care that PAs provide.”

Bill Finerfrock, Executive Director National Association of Rural Health Clinics

“Removing unnecessary restrictions on PA practice, such as eliminating the requirement for PAs to have an agreement with a specific physician in order to practice, would help alleviate healthcare shortages and improve efficiency with no adverse effects on patient outcomes.”

E. Kathleen Adams, PhD and Sara Markowitz, PhD The Brookings Institution’s Hamilton Project

“States should consider eliminating requirements for rigid collaborative practice and supervision agreements between physicians [...] and their care extenders (e.g., physician assistants [...]”).
