

Ad Hoc Committee on Family Practice/Primary Care

Committee Charges

- The committee will identify current and/or emerging barriers to PAs entering PC/FP and discuss options to eliminate the barriers.
- The committee will provide advice on future congressional and state (if any) legislative priorities that could strengthen us in this area.
- The committee will advise staff regarding the impact of new healthcare models that might use PAs in family medicine
- The commission will provide advice to update the Guidelines for State Regulation of PA Practice.
- The committee will provide suggestions for position papers related to the future of PAs in primary care/FP
- The committee shall look at whether postgraduate education is needed for practicing in family practice and how one would obtain this education and well as unique and out of the box ways for PAs to be included in practices with physicians and NPs.
- The committee shall look at credentialing and reimbursement barriers and solutions
- The committee will provide suggestions for position papers related to the future of PAs in family practice/primary care.
- The committee shall determine a road map for the profession to follow to help it succeed in this specialty
